

Professional lifting with Mechchain Pro

Easily manoeuvred chain lifter

The Mechchain is an extremely easy-to-maneuver lifting unit for professional lifting. Frequency control gives a stepless lifting speed controlled by a joystick. Mechchain Pro combines high precision with an impressive lifting speed.

This lifting unit is suitable when a well-controlled and precise movement is required. Integrated in its travelling carriage, it has the lowest required ceiling height on the market, enabling installation also in cramped work spaces.

Also available with remote control!

- ✓ Quiet
- ✓ Fast
- ✓ Accurate

Typical application areas:

- general lifting with slings or hooks
- lifting within general industry
- assembly work requiring high precision lifting
- material handling with customized grippers
- packing onto pallets and roller conveyors
